

Summer 2024

Advanced Cardiothoracic Surgical Skills Internship

UCLA

[Apply Now](#)

About this program

The Advanced Cardiothoracic Surgical Skills Program (ACSSP) is designed for students who have successfully completed and developed fine motor skills at the Basic - Intermediate Cardiothoracic Surgical Skills Summer Internship. This two-week intensive Advanced Program will further strengthen students' knowledge and allow them to hone their skills by performing complex congenital heart procedures, including Tetralogy of Fallot repair, Norwood procedure, Left Ventricular Assist Device (LVAD) implantation, and Fontan procedure. This program is fast-paced and highly rigorous.
